PERGAMON PRESS LONDON · NEW YORK · PARIS · LOS ANGELES

CONTENTS

No. 1

HAROLD C. UREY, ALDO MELE and TOSHIKO MAYEDA: Diamonds in stone meteorites . . 1

SAYED A. EL WARDANI: On the geochemistry of germanium 5

ALFRED M. POMMER: Reduction of quinquevalent vanadium solutions by wood and lignite . 20

R. S. YOUNG: The geochemistry of cobalt 28

H. G. F. WINKLER: Experimentelle Geseinsmetamorphose—I. Hydrothermale Metamorphose karbonatfreier Tone 42

Some Current Papers in Other Journals 70

Announcement 80

Report of Meeting 80

Nos. 2/3

L. R. WAGER, J. VAN R. SMIT and H. IRVING: Indium content of rocks and minerals from the Skaergaard intrusion, East Greenland 81

JACK GREEN and ARIE POLDERVAART: Petrochemical fields and trends 87

A. A. SMALES, D. MAPPER and A. J. WOOD: Radioactivation analysis of "cosmic" and other magnetic spherules 123

ROY S. CLARKE, JR. and ZALMAN S. ALTSCHULER: Determination of the oxidation state of uranium in apatite and phosphorite deposits 127

AKIMASA MASUDA: Isotopic composition of primeval lead of the earth 143

E. D. GOLDBERG and G. O. S. ARRHENIUS: Chemistry of Pacific pelagic sediments . . . 153

GEORGE V. CHILINGAR: Some data on diagenesis obtained from Soviet literature: A summary . 213

Geochemical Note:

DONALD L. GRAF and JULIAN R. GOLDSMITH: The solid solubility of $MgCO_3$ in $CaCO_3$: A revision 218

Letters to the Editors:

R. EULER und E. HELLNER: Hydrothermale und röntgenographische Untersuchungen an gesteinsbildenden Mineralen—II. Über hydrothermale Untersuchungen in Druckbomben mit Temperaturgefälle 220

R. EULER und E. HELLNER: Hydrothermale und röntgenographische Untersuchungen an gesteinsbildenden Mineralen—III. Über einen hydrothermal hergestellten Granat (Andradit) 221

News and Notes 223

Papers to be published in future issues 223

In Memoriam 224

638172

QE351
G425
v.13

T. C. Hoering and H. E. Moore: The isotopic composition of the nitrogen in natural gases and associated crude oils 225

Walter Nichiporuk: Variations in the content of nickel, gallium, germanium, cobalt, copper and chromium in the kamacite and taenite phases of iron meteorites 233

G. W. Reed, H. Hamaguchi and Anthony Turkevich: The uranium contents of iron meteorites 248

Frank Cuttitta and Jesse J. Warr, Jr.: Retention of lead during oxidative ashing of selected naturally occurring carbonaceous substances 256

Elaine G. Murray and John A. S. Adams: Thorium, uranium and potassium in some sandstones 260

John A. S. Adams, Jasper E. Richardson and Charles C. Templeton: Determinations of thorium and uranium in sedimentary rocks by two independent methods 270

Paul E. Damon and J. Laurence Kulp: Inert gases and the evolution of the atmosphere . 280

S. R. Taylor and K. S. Heier: Alkali elements in potash feldspar from the pre-Cambrian of Southern Norway 293

A. E. Ringwood: The constitution of the mantle—I. Thermodynamics of the olivine-spinel transition 303

Charles D. Keeling: The concentration and isotopic abundances of atmospheric carbon dioxide in rural areas 322

Harold C. Urey: Comments on two papers by John F. Lovering concerning a typical parent meteorite body 325

Geochemical Note:
G-1–*W*-1 values—spectrochemical determination using an internal standard 339

Report of Meeting 341

Book Reviews:
"Irradiation Colours and Luminescence. Contribution to Mineral Physics" by Karl Przibram (reviewed by M. Wenzel) 342

"New Research Methods in Hydrology" Edited by Harmon Craig (reviewed by Earl Ingerson) 342

"Introduction à l'étude des roches métamorphiques et des gîtes métallifères" by Pierre Laffitte (reviewed by E. Raguin) 343

GEOCHIMICA ET COSMOCHIMICA ACTA

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*
PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr.* 13, *Göttingen, Germany*
DR. E. INGERSON *Geochemistry and Petrology Branch, U.S. Geological Survey, Washington* 25, *D.C., U.S.A.*
DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*
PROF. F. A. PANETH, F.R.S. *Max-Planck-Institut für Chemie, Mainz, Saarstrasse* 23, *Germany*
PROF. H. C. UREY, For. Mem. R, S. *The Enrico Fermi Institute for Nuclear Studies, University of Chicago, Illinois, U.S.A.*
DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*
PROF. A. P. VINOGRADOV *Vernatsky Institute, Moscow, U.S.S.R.*
PROF. L. R. WAGER, F.R.S. *Department of Geology and Mineralogy, The University, Oxford, England*
PROF. F. E. WICKMAN *Naturhistoriska Riksmusects, Mineralogiska Avdelning, Stockholm* 50, *Sweden*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers on geochemistry should be submitted to the editors for the appropriate country or language (*Papers on cosmochemistry should be sent to Prof. F. A. Paneth, F.R.S.*). Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta*.

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French, or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS L. H. (1952) *Geochim. et Cosmochim. Acta* **2**, 168.

and should include the standard abbreviated title of the journal, year, volume number, and page number.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.
